### **DETAILED ACTION**

This office action is responsive to Request for Continued Examination (RCE) filed on 10/16/2006.

#### ***Response to Amendment***

The Examiner has acknowledged the amended the cancellation of claims 1 – 26, and the submission of new claims 27 – 52.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 27 – 41 are rejected under 35 U.S.C. 102(e) as being anticipated by Lai et al (US 2004/0193648; hereinafter Lai).

Regarding claims 27, 40, and 46, Lai teaches a computer system and a method comprising a processor and a memory (fig. 2; paragraph [0066]) for retrieving digital media from a content provider (paragraphs [0030], [0067], and [0127]; performing a digital rights management function associated with an authorized user resulting in authorized digital media content (paragraphs [0007], [0141], and 0164]); storing the authorized digital media content on the computer system (paragraphs [0155] - [0159];

Art Unit: 2157

and providing the authorized digital media content via a user interface to a thin media client without performing a digital rights management function on the thin media client (paragraphs [0030], [0143]).

Regarding claims 28 and 47, Lai teaches the system and method of claims 27 and 46, wherein the computer system comprises a personal computer (viewer client 102, fig. 1; paragraphs 0085 - 0089).

Regarding claims 29 and 48, Lai teaches the system and method of claims 27 and 46, wherein the content provider comprises a laptop computer (paragraphs 0085 - 0089).

Regarding claims 30 and 49, Lai teaches the system and method of claims 27 and 46, wherein the content provider comprises a server reachable by the computer system over a network (paragraphs 0085 - 0089).

Regarding claims 31 and 51, Lai teaches the system and method of claims 27 and 46, wherein the content provider comprises a local input device (paragraphs 0085 - 0089).

Regarding claims 32 and 33, the Examiner takes Official Notice that having a content provider, which comprises a USB, and a CD-ROM is well known in the art.

Regarding claims 34 and 50, the Examiner takes Official Notice that using a Bluetooth to receive authorized digital media content is well known in the art.

Regarding claims 35 and 36, Lai teaches the system of claim 27, wherein the thin media client comprises an audio client; and wherein the digital media content comprises an audio file (paragraphs [0005], and [0087] – 0088)).

Regarding claims 37 and Lai teaches the system and method of claims 2 and 16, wherein the digital media content comprises realtime audio information (paragraphs [0010], [0014], [0086], and [0138]).

Regarding claims 38 – 39, Lai teaches the system and method of claims 2 and 15, wherein the thin media client comprises a video client, and wherein the digital media content comprises video information; and wherein the thin media client comprises an image client, and wherein the digital media content comprises image information (paragraphs [0005] and [0170]).

Regarding claim 41, Lai teaches the system of claim 40, wherein the organization functions allow a user to set preferences associated with a client (paragraph [0099]).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 2157

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 42 – 45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lai et al (US 2004/0193648; hereinafter Lai) in view of John C. Platt (US 6,987,221; hereinafter Platt).

Regarding claim 42, Lai teaches substantially all the limitations in claim 40, but fails to specifically teach that the organization functions allow a user to create playlist of stored organized digital media content.

However, Platt teaches an analogous auto playlist generation with multiple seed songs, which allows a user to create a playlist of stored organized digital media content (col. 1, lines 12 – 67; col. 2, lines 16 – 36; col. 4, lines 4 – 11 and lines 45 - 50).

Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the teachings of Lai by incorporating an organization functions that allow a user to create playlists of stored organized digital media content as evidenced by Platt for the purpose of permitting user(s) to select different moods and/or styles (e.g., dance music, classical, big band, country, heavy metal and the like), thereby allowing a playlist that meets user's preferences.

Regarding claim 43, Lai and Platt teach all the limitations in claim 40, and Platt further teaches that the organization functions allow a user to manage a favorites list of organized digital media content (col. 1, lines 12 – 67; col. 2, lines 16 – 36; col. 4, lines 4 – 11 and lines 45 - 50). The motivation in claim 41 also applied for claim 43.

Art Unit: 2157

Regarding claim 44, Lai and Platt teach all the limitations in claim 40, and Platt further teaches that the organization functions allow a user to manage the amount of organized digital media stored on the computer system (col. 1, lines 12 – 67; col. 2, lines 16 – 36; col. 4, lines 4 – 11 and lines 45 - 50). The motivation in claim 41 also applied for claim 44.

Regarding claim 45, Lai and Platt teach all the limitations in claim 40, and Platt further teaches that the organization functions allow a user to select digital media content to be retrieved (col. 1, lines 12 – 67; col. 2, lines 16 – 36; col. 4, lines 4 – 11 and lines 45 - 50). The motivation in claim 41 also applied for claim 45.
